

IIBA International Conference*

* We are applying for CEUs in all mental health disciplines

The 24th IIBA International Conference will focus on three domain areas.

1. The centrality of sexuality in all its manifestations: desire, passion, longing, love, affection, procreation, intimacy, and the ever-increasing understanding of the nature and importance of attachment and relationship in human life.
2. The impact of chronic relational trauma and its effects on the soul and the somatopsyche.
3. Social consciousness and social action: the insight provided by a bioenergetic understanding of how these attitudes and behaviors are structured into the somapsyche in the form of character organization and personality organization.

For full information go to the website dedicated to the Conference:
